123.hp.com/setup

In my opinion, your printer should be working now IF not working then you can do one more thing go to **123.hp.com/setup** and find their **HP printer**. Download HP printer doctor and install it. After installation is done open the Hp printer doctor Icon from your desktop and run it and follow the steps.

I must say now your printer is working fine if not for 123.hp.com/setup

Contact us. We are working in Printer Setup services since 2011 in the United States of America.For **A1PrinterRepair** too.
